

# Veeam Availability Platform

## Components of Veeam Availability Platform

### Veeam Availability Suite™

Veeam's flagship product, delivering Availability for virtual, physical and cloud-based workloads via Veeam Backup & Replication™ and Veeam ONE™.

### Veeam Agent for Microsoft Windows/Veeam Agent for Linux

Provides Availability for physical and cloud-based workloads hosted by Windows- or Linux-based servers.

### Veeam Backup for Microsoft Office 365

Enables Microsoft Office 365 backup and recovery, allowing you to maintain access to your email data.

### Veeam Availability for AWS

Provides Availability for AWS cloud-based workloads via backup and recovery of AWS EC2 instances.

### Veeam Availability Orchestrator

Delivers DR (disaster recovery) orchestration of Veeam backups and replicas.

### Veeam Availability Console

Management platform for service providers and distributed enterprises; brings all-in-one management and visibility for virtual, physical and cloud-based workloads.

### Veeam Cloud Connect

Veeam's key underpinning technology; enables workloads and data to move among on-premises and cloud-based locations.

Veeam enables any business to deliver the uninterrupted Digital Life experience users expect with **Veeam Availability Platform**, delivering the next generation of *Availability for the Always-On Enterprise™*. Veeam Availability Platform provides businesses and enterprises of all sizes with the means to ensure Availability for any app, any data, on any cloud, through the following capabilities:

- **Non-Stop Business Continuity** to instantly recover any app, any data, on any cloud
- **Digital Transformation Agility** with multi-cloud data management and migration – choose your cloud, your way
- **Analytics & Visibility** with actionable insights for data management, operational performance, and compliance
